Net Capacity:

Product Dimension (W x H x D):

①	TSC BELLONA 38 (D)	Free standing only	115 litres	501 x 840 x 582 mm
②	TSC BELLONA 45	Free standing / Built-in	145 litres	595 x 820 x 572 mm
③	TSC BELLONA 45 (SS)	Free standing / Built-in	145 litres	595 x 820 x 617 mm
④	TSC BELLONA 110	Free standing / Built-in	321 litres	595 x 1392 x 680 mm
⑤	TSC BELLONA 166	Free standing / Built-in	424 litres	595 x 1764 x 680 mm
⑥	TSC BELLONA 166 (SS)	Free standing / Built-in	424 litres	595 x 1764 x 727 mm

**4 cabinet sizes**  
to offer capacity for up to 151 bottles

**2 types of door handle**

You can be selected either the stainless steel door with cylindrical handle or black door with recessed handle. Both are reversible doors that can be adjusted to either the right or left, allowing the wine cooler to adapt to its environment and surroundings.

**2 types of door**

Black plastic door

Seamless stainless-steel door

**Child Lock**

The child lock is designed to secure the wines and keeps children and unwanted guests out.

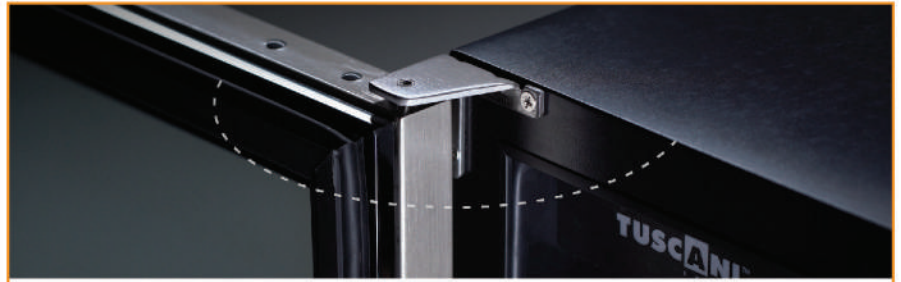

### Beech Wood Shelves

The shelves can be completely repositioned inside the wine cooler. The beech wood structure ensures sturdiness of the storage zone, absorbs vibration and reduces bad odours.

### Door Hinge Design

180° door opening angles, it's more easier for you to access bottles.

### Lighting

The lights activated when the door is opened. The interior lighting can be switched on or off via the light button located on the electronic control panel.

### Constant Temperature

Inspiration can be set to one temperature chosen between 5° and 18°, allowing you to have all of your bottles at an ideal serving temperature, according to the type of wine and selected temperature setting.

### Ventilation

The role of wine cooler ventilation is to maintain good air in the cooler, control the temperature and create the perfect aging conditions for wines.

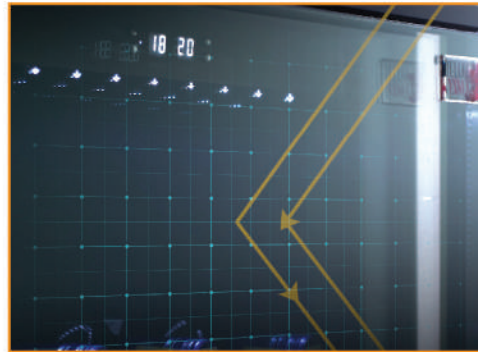

### Vibration Free

The low-vibration compressor keeps wines at a steady temperature and lets wines rest undisturbed, without the vibration that can harm delicate wines.

### Charcoal Filter

The charcoal filter serves to sanitise the ambient air. It absorbs the bad odours, thus avoiding wines from being contaminated and losing its taste qualities.

### UV Protection

Low-E glass helps prevent exposure of wines from damaging ultraviolet rays. This feature also minimizes energy costs, because it reduces the amount of cooling energy required to maintain the desired wine cooler environment.

### "Front-vented" system

Ventilation at the front and an air vent allow you to place the cabinet under a work surface.

Except for TSC Bellona 38 (D)
